To the esteemed participants of Ahavas Olam Torah Center - נועם ה' אליכם

In this pre-*Pesach* season, as we clean our homes of physical *chometz*, we must not forget to take stock of the spiritual *chometz* in our midst.

For the past two years, tremendous progress has been made among Ahavas Olam Torah Center participants in the realm of internet protection. Some 50 users have accepted upon themselves to enhance and protect their spiritual purity by installing the nationally acclaimed Yishmoreini program on their home or business computers. This monitoring program is "the most powerful deterrent with the least intrusion" available today on the market (see [yishmoreini.com](http://yishmoreini.com) for detailed information regarding the uniqueness of this non intrusive system).

Unfortunately, this program was not previously designed for smartphones or tablets.

I am happy to inform the Olam that Yishmoreini has now configured the system to work for smartphones with the Android operating system. Those that have Yishmoreini accounts already can download the Yishmoreini program on to their smartphone or tablet using the same account and password. Those that would like to open new accounts should contact me directly.

**To date there is no effective monitoring system available for the iPhone or iPad!**

I strongly recommend anyone who does not need an iPhone or iPad to make the switch to the Android phone. This move will undoubtedly bring *nachas ruach* to *Hashem*.

For those who only need email on their hand held devices, the software programmers at [guardyoureyes.com](http://guardyoureyes.com) have now developed a unique download that will remove the internet access from the BlackBerry device. Many individuals are now utilizing their BlackBerry with this software. See the [guardyoureyes.com](http://guardyoureyes.com) website for more details.

The latest advances in digital technology are our generation's unique *nisayon*, let us show *Hashem* we are at least trying to do something about it.

May we all merit true purity and its accompanied *berachos*.

With great respect,

Rav Simcha Klein
